

## Noor Muhammad

Software Developer

noorszps@gmail.com | [Linkedin.com/in/noormuhammad](#) | [GitHub.com/NoorMutant](#) | [NoorMuhammad.com](#)

### SKILLS

**Languages** Proficient C++ · C · Python · HTML · CSS · JavaScript Intermediate SQL · PHP

**Frameworks** Bootstrap · Git · Selenium · Flask

**Creative** Public Speaking · Leadership · Team Collaboration · Photography · Project Management

### Certifications

#### • Harvard CS 50: Intro to CS

- Gained foundational knowledge in computer science, covering topics like algorithms, data structures, memory management, and web development using languages such as C, Python, SQL, HTML, CSS, and JavaScript.

#### • Harvard CS 50 AI: Intro to Artificial Intelligence

- Explored core AI concepts including search algorithms, machine learning, neural networks, and natural language processing, with practical implementation using Python.

#### • Successful Negotiation: University of Michigan

- Learned essential negotiation strategies encompassing preparation, execution, closing deals, and performance evaluation to achieve mutually beneficial outcomes.

#### • Version Control By Meta

- Acquired skills in using version control systems like Git, understanding collaborative workflows, and employing command-line tools to manage codebases effectively.

#### • Introduction To Database By Meta

- Gained insights into database concepts, including relational databases, SQL queries, normalization, indexing, and basic transaction management.

#### • Mindware: Critical Thinking for the Information Age

- Developed critical thinking skills by studying concepts from statistics, probability, scientific methodology, and cognitive psychology to make informed decisions.

#### • Google Sheets by Google Cloud

- Learned to create, edit, and manage spreadsheets using Google Sheets, including data entry, formatting, and basic formula application.

#### • Teamwork Skills: Communicating Effectively in Groups

- Enhanced abilities in group communication, conflict resolution, decision-making, and collaboration within team environments.

#### • Stock Valuation with Comparable Companies Analysis

- Understood methods to evaluate company value by comparing financial metrics with peer organizations, aiding in investment decisions.

#### • Excel Skills for Business: Essentials

- Mastered fundamental Excel functions such as data entry, formula creation, chart generation, and basic data analysis techniques.

### EXPERIENCE

**Internship as Python Developer** DevFor RYK

Sep-Nov 2024

- Engineered a scalable Python scraping framework using Selenium WebDriver, regex parsing, multithreading, and Google Maps Geocoding API to extract and enrich data from 3,000+ real estate listings, then serialized JSON output and dispatched to AWS SQS for downstream processing.

### PROJECTS

#### Stock Trading Web App ("Finance")

- Built a full-featured stock trading platform using Flask, SQLite, and Alpha Vantage API, where users can register, buy/sell stocks, and track their portfolio in real-time. Integrated API calls for live stock prices and ensured secure session management.
- Implemented user authentication, real-time portfolio tracking, and transaction processing. Technologies: Python, Flask, SQLite, REST APIs, HTML/CSS, JavaScript

#### Flask Blog Web App

- Designed and deployed a personal blog using Flask, allowing users to create, update, and delete posts. Demonstrated RESTful routing, template inheritance, and form handling in Flask. Technologies: Python, Flask, SQLite, Jinja2, Bootstrap
